IT'S ALL IN THE DETAIL

This client was extremely proud of the success of the build for this project but felt reluctant to furnish the property with built-in features that might detract from the stunning interior architectural detailing. The client contacted Rosalind Wilson Design to discuss their design vision and aspirations, to transform their property into a beautiful home with a considered interior scheme that would feel grand yet welcoming. The design process started with a trip to Milan in Paris and Salone de Mobile in Milan with the client to gather inspiration for their look and feel. This allowed Ros and her team to get a good understanding of the client's personal taste. Intricate design details and a rich colour palette have merged to create a beautiful eclectic feel perfect for relaxed family get-togethers or elegant entertaining of guests.

This Wincoburn Hill family home, was designed by Rosalind Wilson Design and completed in December 2016.
Photography by Richard Wain.
